

Welcome

Tuesday, 26 November 2013 19:14 - Last Updated Wednesday, 14 December 2016 01:39

Welcome to 432 EVO, the first handmade-in-Belgium 432 Hz music server. The EVO can rip your CD's, play your existing files up to 32/768 PCM and DSD64 & DSD128 files, all in the better sounding A=432 Hz tuning. Live switching between 440 and 432 Hz. The 432 EVO supports HDMI AUDIO up to 192K and USB 2.0 output compatible with most USB dacs. High-end options with high-end linear supply, RAM playback and spring suspension system for HDD are also available, with a dedicated USB 3.0 low noise low jitter output. 2 TB silent storage for up to 6000 CD's, extendable by an external NAS.

The 432 EVO can be controlled by both Apple and Android devices, and via any webbrowser:
